

CALL FOR PAPERS

ICACA 2023
Nov 18-19, 2023
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACA 2023 : International Conference on Advances in Computational Agriculture is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Computational Agriculture. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational agriculture	Computerized decision-support aids
Computational modeling in agriculture	Expert systems and simulation models
Computational methods for agricultural research	Electronic monitoring and control of livestock/crop production
Computational biology for sustainable agriculture	Monitoring and control of post-harvest operations
Computational modeling for irrigated agriculture planning	Artificial intelligence applications in agriculture
Computer and computing technologies in agriculture	Sensors, machine vision, robotics and simulation modelling
Computers and electronics in agriculture
