

# CALL FOR PAPERS

**ICEEST 2023**  
**Nov 18-19, 2023**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEST 2023 : International Conference on Electrochemistry and Energy Storage Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrochemistry and Energy Storage Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrochemistry	Electrocatalysis
Bioelectrochemistry and biological interfaces	Electrodeposition and electroplating
Electrochemistry in biomedical science and technology	Corrosion and passivity
Bioenergetics and photobioelectrochemistry	Advances in molecular electrochemistry
Artificial photosynthesis and photo-electrochemistry	Photoelectrochemistry and electrochemiluminescence
Nanoscale electrochemistry	Hyphenated electrochemical techniques
Electrochemistry for environmental applications	Electrochemical instrumentation
Electrochemical process technology and engineering	Applications of electrochemical engineering
Frontiers in analytical electrochemistry and sensing	Education for electrochemistry and electrochemical
Electrochemistry of functional materials	Energy storage materials and technology
Electrochemical energy storage and conversion	Capacitor and supercapacitor
Interfacial electrochemistry and spectroelectrochemistry	Capacitor battery
Theoretical and computational electrochemistry
