

CALL FOR PAPERS

ICCPAM 2023
Nov 11-12, 2023
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPAM 2023 : International Conference on Civil Engineering, Practical Approach and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering, Practical Approach and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering
Civil engineering practice
Specialist practice
Practical approach
Management practices
Practical application of new technologies
Adapting civil engineering practice
Civil engineering works
Civil engineering planning
Civil engineering contracts
Civil engineering construction
Infrastructure projects
Transport systems and water supply networks

Consultant of civil engineering works
Construction management and analysis
Environmental concerns
Creating and maintaining structures
Materials science and statistical analysis
Functional structures
Strengthening and rehabilitating structures
Manufacturing processes
Structures that surround us: buildings, transport networks, energy and water supplies
Design, construction and maintenance of the physical and naturally built environment
Materials science
Construction and structure
Water resources
