

CALL FOR PAPERS

ICEAS 2023
Nov 11-12, 2023
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEAS 2023 : International Conference on Ecological Architecture and Sustainability is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Architecture and Sustainability. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecological architecture
Sustainable architecture and green buildings
Negative environmental impact of buildings
Landscape architecture and sustainable city planning
Green building materials
Technology and engineering applications
Efficiency and moderation of materials, energy and development
Energy and ecological conservation
Sustainable energy use
Heating, ventilation and cooling system efficiency
Renewable energy generation
Solar panels
Wind turbines

Solar water heating
Heat pumps
Sustainable building materials
Recycled materials
Lower volatile organic compounds
Materials sustainability standards
Waste management
Building placement
Sustainable building consulting
Changing pedagogies
Sustainable urbanism and architecture
Low-energy house and zero-energy building
