

CALL FOR PAPERS

ICGDR 2023
Dec 30-31, 2023
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGDR 2023 : International Conference on Geovisualization and Data Representation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geovisualization and Data Representation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geovisualization (geographic visualization)

Analyzing the geospatial data through the use of interactive visualization

Geovisualization, scientific visualization and information visualization

Interactive maps and computer display

2D and 3D information visualization

Distributed simulations and sensor webs

Simulation modeling dynamic geo processes

Geo-visualization and geo-visual analytics

Practical applications of geovisualization

Wildland fire fighting

Forestry

Archaeology

Environmental studies

Urban planning

Animated mapping

Cartography

Computer-aided design

Computer graphics

Computer vision
