

CALL FOR PAPERS

ICASIS 2024
Dec 09-10, 2024
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASIS 2024 : International Conference on Adaptive Software-Intensive Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Adaptive Software-Intensive Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software-intensive systems
Engineering adaptive
software-intensive systems
Eternal software-intensive systems
Embedded systems
Service-oriented systems
Interaction and adaptation
Human-oriented systems
Software quality
Data assessment and processing
Data segmentation
Model comparisons
Cost estimation models
Conventional software engineering

Software intensive systems data
quality
Relational query processing as a
basis for software design
Design maintenance systems
Experimental methods for formal
design
Model-based development for control
software development
Physiological and social complexity
of software-intensive systems
Verified software generation and
composition from requirements
Abstraction, adaptation and testing
of software-intensive systems
Design techniques for
software-intensive systems
Constructing flexible dependable
software-intensive systems
Development of reliable models and
components
Context-aware software-intensive
systems
