

CALL FOR PAPERS

ICRE 2017
Sep 21-22, 2017
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRE 2017 : International Conference on Railway Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Railway Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Condition monitoring technology of
all railway sub-systems
Intelligent infrastructure and
asset management strategies
Event recording and data
logging
Predictive analysis tools and
techniques
State-of-the-art sensing
techniques and non-destructive
testing
Data management, standards,
modelling and presentation

Condition-based maintenance and
reliability-centred maintenance
System management and cost
benefit analysis
Non-destructive testing
Interoperability
Rail Safety and Security
New Technology e.g. driverless
operation and technology, energy
efficiency and carbon emissions
strategy
