

# CALL FOR PAPERS

**ICSETA 2019**  
**Sep 19-20, 2019**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSETA 2019 : International Conference on Structural Engineering Technology and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Engineering Technology and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction engineering technology	Structural systems
Engineering graphics	Industrial cost analysis
Applied computer aided design	Construction testing
Technology and environment	Design of temporary structures
Statics for technology	Construction mathematics
Construction procedures	Concrete and soils technology
Strength of materials for technology	Building science
Structural analysis in construction	Project planning and scheduling
Construction computing	Estimating
Construction codes and regulations	Construction equipment
Principles of management	Construction project management fundamentals
Construction safety	Concrete structures and formwork
Soils and earthworks	Emerging trends and technologies in construction
