

CALL FOR PAPERS

ICNRSIE 2019
Nov 18-19, 2019
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNRSIE 2019 : International Conference on Networked Robotic Systems and Integrated Experiments is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Networked Robotic Systems and Integrated Experiments. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Networked robotics	Wave-variable framework
Networked robotic systems	Intelligent networked robot systems
Network robot systems	for symbiotic interaction
Interaction mechanisms	Scientific and technical
Control of networked robotic system	challenges
Synchronization of networked robotic systems	Future challenges
Task-space synchronization	Human-robot detection and localization
Realistic simulation of networked multi-robot systems	Waving recognition
Connectivity awareness in networked robotic systems	Decision-making under uncertainty
Nondeterministic modeling and verification	Integrated experiments
Cooperative control of networked robotic systems	Task allocation
	Sensor selection
