

# CALL FOR PAPERS

**ICMAEC 2019**  
**Nov 12-13, 2019**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMAEC 2019 : International Conference on Multi-Access Edge Computing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multi-Access Edge Computing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multi-access edge computing  
Radio resource management for multi-access edge computing  
Task scheduling and computation resource management for multi-access edge computing  
Virtualization and network slicing for multi-access edge computing  
Location and sizing of computation and storage elements for multi-access edge computing  
Communication protocols and network architectures for multi-access edge computing  
Security, privacy, and reliability in multi-access edge computing  
QoE and QoS provisioning in multi-access edge computing  
5G/LTE/WiFi enabled multi-access edge computing

Energy management and green multi-access edge computing  
Edge-to-cloud integration and protocols for multi-access edge computing  
Human and social-driven design of multi-access edge computing  
Multi-access edge computing applications  
Video analytics  
Location services  
Internet-Of-Things (IoT)  
Augmented reality  
Optimized local content distribution and data caching
