

CALL FOR PAPERS

ICCMBE 2019
Dec 19-20, 2019
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMBE 2019 : International Conference on Computational Medicine and Biomedical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Medicine and Biomedical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Large-scale computing/computations
Mathematical multi-scale
modelling/simulation
Clinical translational
science/technology-oriented
computing/computations
Large-scale net-centric based
information systems
Systems architecture,
integration/implementation, system
of systems
Open systems architecture,
interface protocols for
interoperability
Digitalisation/standardisation
Interoperability/sustainability

Electronic medical/patient records
Data transfer metrics, distributed
systems, networks/communications
Workflow management, operational
research/optimisation
Intelligent computing, data mining
Service computing (web/grid/cloud),
data-intensive computing
Data security, patient
confidentiality
Data visualisation/display, data
representation/reconstructions
