

CALL FOR PAPERS

ICBSSD 2019
Dec 19-20, 2019
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSSD 2019 : International Conference on Building Science and Sustainable Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building Science and Sustainable Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Building science and technology
Acoustic classification criteria in
labelling systems for office
buildings, housing and educational
buildings
Acoustic comfort and vibration
perception
Advanced façades: high-performance
building envelopes
Allied building materials
Analytical/design methods
Architectural acoustics
Architecture and building
engineering
Blast engineering
Bridges, tall buildings
Building acoustics
Building and architectural
acoustics
Building engineering applications

Building integrated renewable
energy sources
Building interactions with the
environment
Building materials and components
Building materials and building
components (performances)
Building performance
Building physics
Building physics for sustainable
built environment
Building science
Case studies
Clashes in technical standards:
issues regarding multi-compliant
performance measures
Components
Construction and building
technology
Daylighting effects on human health
and wellbeing and on building
performances
