

CALL FOR PAPERS

ICISSPL 2019
Dec 19-20, 2019
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICISSPL 2019 : International Conference on Industrial Systems and Software Product Lines is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Industrial Systems and Software Product Lines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Introducing PLE to an organization,
migration to a product line
approach
Business ecosystems around product
line engineering
Processes and methods, e.g.,
combining PLE with DevOps and agile
practices
Scoping of product/solution
portfolios and assets
Architecture, design, and
implementation of product lines
Variability management across all
stages of the life-cycle

Quality and non-functional
properties in PLE and software
ecosystems
PLE tools and methods for guidance
and governance
Product line testing and
validation
Version and configuration
management
Disruptive innovations and their
effects on software product lines
