

CALL FOR PAPERS

ICSTED 2019
Dec 19-20, 2019
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTED 2019 : International Conference on String Theory and Extra Dimensions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of String Theory and Extra Dimensions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

String theory and supersymmetry
String theory and theory of entanglement
String theory and extra dimensions
Bosonic string action
Classical action for particles
Symmetries and field equations of the bosonic string
Symmetries and canonical quantization
Removing ghost states and light-cone quantization
Conformal field theory
Radial quantization and operator product expansions

Quantization of the bosonic string
Supersymmetric string theories
Effective actions, dualities, and m-theory
Strings and extra dimensions
Extra dimensions and particle physics
Extra dimensions and the hierarchy problem
Inflation in string theory
Residue theorem
Wick's theorem
