

CALL FOR PAPERS

ICICT 2019
Dec 04-05, 2019
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICT 2019 : International Conference on Information and Coding Theory is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information and Coding Theory. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Source coding, space time coding
Detection and estimation theory
Information and differential
entropy
Channel capacity, input-constrained
channels
Kolmogorov complexity, quantum
information science
Codes
construction/existence/analysis
Information algebra/geometry

Non-existence results for codes,
bounds for codes/designs
Decoding algorithms
Algebraic combinatorics
Network coding and lattice theory
Wireless/multimedia applications,
mobile communication channels
Computational complexity,
cryptography
Communication combinatorial
problems
