

CALL FOR PAPERS

ICMFEM 2020
Jan 13-14, 2020
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMFEM 2020 : International Conference on Modern Finite Element Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Modern Finite Element Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Innovative finite element method
Galerkin discontinuous methods
Mimetic methods with polygonal elements
Time dependent meshes and remeshing
Iso-parametric high degree elements
Multiscale elements

Domain decomposition finite element methods
Sparse grid finite element methods
Isogeometric elements
Level sets based finite element method optimization
C++ finite element method toolbox
