

CALL FOR PAPERS

ICBECM 2020
Jan 30-31, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBECM 2020 : International Conference on Bridge Engineering, Construction and Maintenance is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bridge Engineering, Construction and Maintenance. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bridge engineering
Bridge analysis, design and assessment
Innovative bridge construction
Bridge technology
Bridge asset management
Bridge management strategies
Bridge engineering heritage
Sustainability and life cycle cost
Codes and standards
Material technology
Field applications and case studies
Lessons learnt from bridge damages and failures
Load assessment

Etymology and history of bridge
Types of bridges
Fixed or movable bridges
Double-decked bridges
Three-way bridges
Aesthetics
Architecture, building, construction, infrastructure and environment
Architecture, construction and environmental engineering
Building electrical systems
Building materials and constructions
Building mechanical systems
Building structural systems
Building, construction and interiors
