

CALL FOR PAPERS

ICPIO 2020
Jan 30-31, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPIO 2020 : International Conference on Process Intensification and Optimization is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Process Intensification and Optimization. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Process intensification
Advanced process intensification
Process intensification in chemical engineering
Process intensification for scalable chemical production
Environmental goals and sustainable processing
Reaction engineering applications
Heat exchange in reaction engineering
Process intensification technologies for green chemistry
Process intensification in the chemical industry
The mechanisms involved in process intensification

Compact and micro-heat exchangers
Reactors
Intensification of separation processes
Intensified mixing
Application areas of process intensification
Petrochemicals and fine chemicals
Offshore processing
Miscellaneous process industries
The built environment, electronics and the home
Specifying, manufacturing and operating PI plant
