

# CALL FOR PAPERS

**ICEM 2020**  
**Jan 30-31, 2020**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEM 2020 : International Conference on Energetic Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energetic Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Insensitive Munitions and Energetic Materials  
The performance of energetic materials: explosives, propellants, pyrotechnics, and thermites  
Energetic Materials  
Explosives  
Propellants  
Pyrotechnics  
Molecular orbital calculations

Synthetic and analytical chemistry  
Formulation, ignition and detonation properties  
Thermal decomposition  
Hazards testing  
Biotechnology  
Toxicological and environmental aspects of energetic materials production  
Topics of discussion include theory, chemistry, material properties, and physics associated with characterization, initiation, combustion, detonation, ageing, thermal decomposition, synthesis, and sensitivity of energetic materials
