

CALL FOR PAPERS

ICIRT 2020
Jan 30-31, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIRT 2020 : International Conference on Innovations in Robotic Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Innovations in Robotic Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Robotic technology
Electrical automation and robotic technology
Robotic vision technologies
Robotics engineering technology
Automation, robotics and software engineering
Industrial robotics and mechanical engineering
Control science and engineering
Adaptive, robust and process control
Complex systems
Co-operative control
Identification and estimation
Nonlinear, intelligent and discrete event systems
Hybrid systems

Networked control systems
Sensor network and hybrid systems
Delay systems and neural networks
Fuzzy systems
Control of biological systems
Precision motion control
Control applications
Control engineering education
Automation science and engineering
Man-machine interactions
Process and intelligent automation
Factory modeling and simulation
Home, laboratory and service automation
