

CALL FOR PAPERS

ICDEA 2020
Jan 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDEA 2020 : International Conference on Dendrochronology and Ecological Amplitude is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dendrochronology and Ecological Amplitude. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dendrochronology	Limiting factors
Tree-ring dating	Climate change
Analysis of patterns of tree rings	Standardization
Dendrochronology and environmental change	Characteristic patterns of wide and narrow rings
Growth rings	Tree-ring growth patterns
Dendrochronological analysis	Sampling and dating
Crossdating	Reference sequences
Chronology building	Direct indicator approach
Sensitivity	Physical measurement approach
Replication	The grid approach
Site selection	Applications
Ecological amplitude	Radiocarbon dating calibration
Aggregate tree growth	Climatology
