

CALL FOR PAPERS

ICAPFT 2020
Jan 30-31, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPFT 2020 : International Conference on Applications of Proteomics in Food Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Proteomics in Food Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Proteomics in food science
Application to plants
Application to farm animals
Application to aquaculture
Processed foods
Proteomic investigations of foods
Protein modifications
Food spoilage, pathogenic organisms
and allergens

Proteomics in milk and milk
processing
Wheat grain proteomics for the food
industry
Evaluation of fish quality and
safety by proteomics techniques
Food authentication with proteomic
analysis
Microbial proteomics for food
safety
Hybrid technologies
Current research methodologies
Practical applications of
proteomics
