

CALL FOR PAPERS

ICSCMC 2020
Jan 30-31, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCMC 2020 : International Conference on Soft Computing, Mathematics and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soft Computing, Mathematics and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Abstract Algebra and Applications
Adaptive control
Agriculture, environment, health applications
Algorithms
Applications of modelling in science and engineering
Artificial Neural Networks (ANN)
Computational Complexity
Computer modelling
Control theory
Differential Geometry
Digital control
Discrete Mathematics
Embedded systems

Evolutionary algorithms
Fault detection and isolation
Feedback control
Functional Analysis
Fuzzy logic and applications
Fuzzy set theory
Genetic Algorithms
Genetic algorithms and evolutionary computing
Graph Theory and Applications
Hybrid systems
Industry, military, space applications
Linear and nonlinear control systems
Linear and Nonlinear Programming
