

CALL FOR PAPERS

ICGPMA 2020
Jan 16-17, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPMA 2020 : International Conference on Geospatial Predictive Modeling and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Predictive Modeling and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geospatial predictive modeling
Spatial data mining
Predictive models
Deductive method
Inductive method

Spatial data analysis and modeling
Geospatial predictive modelling for
climate mapping
Geospatial environmental data
modelling applications
Geospatial predictive modelling of
the archaeological sites
Predictive modelling and spatial
mapping
