

CALL FOR PAPERS

ICCPEEMS 2020
Jan 30-31, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPEEMS 2020 : International Conference on Climate Protecting Energy and Energy Management Systems is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Climate Protecting Energy and Energy Management Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Climate protecting energy
Efficient energy storage
Energy and climate protection
Multiple use of energy in urban areas
Co-benefits of climate mitigation and health protection in energy systems
Renewable energy technologies
Energy security and climate change protection
Technologies in energy innovation for climate protection
Sustainability and energy management
Solar energy

Geothermal power
Energy conservation
Bioenergy conversion methods
Bioenergy applications
Green energy and economy
Sustainable energy policies
Clean power-station technologies
Modern energy management systems
Energy-efficient products
