

CALL FOR PAPERS

ICSTIC 2020
Jan 13-14, 2020
Zurich, Switzerland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTIC 2020 : International Conference on Software Technology and Intelligent Computing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Technology and Intelligent Computing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Project management of distributed software projects
Collaborative requirement development
Software design and architecture for distributed development
Agile and lean development in distributed teams and organizations
Software testing in a globally distributed environment
Communication, coordination and collaboration
Strategic issues in distributed development

Working with globally distributed contractors
Industrial offshoring and out sourcing experiences
Tools and infrastructure support for distributed software development
Cloud computing and crowdsourcing
Methods and processes for global organizations
Education in global software engineering
