

CALL FOR PAPERS

ICGSSPA 2020
Feb 06-07, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSSPA 2020 : International Conference on Geotechnical Slope Stability and Probabilistic Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical Slope Stability and Probabilistic Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical slope stability
Slope stability analysis
Limit equilibrium analysis
Analytical techniques: method of slices
Swedish slip circle method of analysis
Ordinary method of slices
Modified bishop's method of analysis
Lorimer's method
Spencer's Method
Sarma method
Comparisons

Rock slope stability analysis
Limit equilibrium analysis
software
Limit analysis
Stereographic and kinematic analysis
Rockfall simulators
Numerical methods of analysis
Continuum modelling
Discontinuum modelling
Hybrid/coupled modelling
Rock mass classification
