

CALL FOR PAPERS

ICSEP 2020
Feb 06-07, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEP 2020 : International Conference on Sustainable Energy Planning is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Energy Planning. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy planning	Modeling externalities of energy
Sustainable energy planning and management	Evaluation of environmental externalities
Modeling and decision support systems	Internalizing external effects in energy planning
Energy economics and modeling	Electrical power generating system
Economic-environment-energy modeling	The pricing of environmental externalities
Various modeling approaches	Energy risk management
Theory of energy economics	Price volatility and risk management
Energy demand/supply adequacy	Energy derivatives
Energy demand modeling and forecasting	Value-at-risk
Electrical power generation planning	Portfolio risk analysis and application to electricity supply planning
Comparative assessment of energy strategies	Electricity demand forecasting
Simulation of energy markets
