

CALL FOR PAPERS

ICSRESDA 2020
Feb 06-07, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSRESDA 2020 : International Conference on Software Re-Engineering, System Design and Assessment is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Re-Engineering, System Design and Assessment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|-------------------------------|-----------------------------------|
| Software re-engineering | Legacy system replacement |
| Re-engineering process | Legacy system change |
| Reverse engineering | Legacy system design |
| Program restructuring | Legacy system assessment |
| Re-engineering advantages | System quality and business value |
| Re-engineering cost factors | Legacy system categories |
| Source code translation | Cost/benefit factors |
| Program structure improvement | Software maintenance |
| Program modularization | Evolving systems |
| Data re-engineering | The maintenance process |
| Data problems | Maintenance costs |
| Component reusability | System documentation |
| Legacy systems | Maintenance measurements |
