

CALL FOR PAPERS

ICLPHSE 2020
Feb 03-04, 2020
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICLPHSE 2020 : International Conference on Low Power Hardware Security Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Low Power Hardware Security Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hardware Trojan attacks, detection,
and countermeasures
Hardware obfuscation and reverse
engineering
Metrics, assessment, and security
policies
Hardware security primitives
Fault injection, detection, and
mitigation
Reconfigurable devices for
security
System-on-chip and FPGA security

Machine learning for hardware
security
Security for emerging technologies
Architectural security methods
Trustworthy manufacturing
Security for IoT, automotive, and
cyber-physical system
Side-channel attacks and
protections
Analog circuit security
