

# CALL FOR PAPERS

**ICUCTCA 2020**  
**Feb 06-07, 2020**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUCTCA 2020 : International Conference on Ubiquitous Communication Technologies and Computing Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ubiquitous Communication Technologies and Computing Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ubiquitous communication technologies and networking  
Modulation, coding, and diversity techniques  
Millimeter-wave and terahertz communications  
Multiple access techniques in wireless networks  
Optical wireless access networks  
Visible light communications and networks

Free space optical communications and networking  
Power line communication technologies  
Maritime, space and underwater communications  
Beyond 4G and 5G communications  
Heterogeneous and small-cell networks  
Satellite communication and networks
