

CALL FOR PAPERS

ICPPP 2020
Feb 03-04, 2020
Melbourne, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPPP 2020 : International Conference on Petrography and Petrological Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Petrography and Petrological Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Petrography
Petrological processes
Interrelationships in
petrographical and petrological
problems
Optical mineralogy and petrography
Petrography of sedimentary rocks
Geologic and stratigraphic setting
Methods of investigation
Macroscopic characters
Microscopic characteristics
Separation of components
Chemical analysis
Specific gravity
Archaeological applications

General classification of igneous,
sedimentary and metamorphic rocks
Description and identification of
igneous, sedimentary and
metamorphic rocks
Mesoscopic and microscopic scale
Theory, experiment and modeling
Field methods
Abundance of different rock types
Igneous petrology
Metamorphic petrology
Chemical petrology
Experimental petrology
Sedimentary petrology
Petrography
Phase diagrams
