

CALL FOR PAPERS

ICACC 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACC 2020 : International Conference on Atmospheric Chemistry and Clouds is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Atmospheric Chemistry and Clouds. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Atmospheric chemistry
Atmospheric composition
Methodology
Observation
Laboratory studies
Modeling
Carbon cycle and climate
Atmospheric chemistry, aerosols and clouds
Composition of tropospheric air
Sources, transport, and sinks of trace gases
Some important tropospheric trace gases
The hydroxyl radical
Some reactive nitrogen compounds

Organic compounds
Carbon monoxide
Ozone
Hydrogen compounds
Sulfur gases
Tropospheric aerosols
Sources
Chemical composition
Concentrations and size distributions
Residence times
Air pollution
Some sources of pollutants
Smogs
