

CALL FOR PAPERS

ICBMAF 2020 Jun 04-05, 2020 New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBMAF 2020: International Conference on Biomolecular Materials and Amyloid Fibrils is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomolecular Materials and Amyloid Fibrils. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

DNA nanotechnology Self-assembling peptides and proteins DNA self-assembled monolayers Amyloid fibrils Virus-like particles Protein and DNA hydrogels
Biomolecular lithography
DNA and protein-mediated assembly
of nanoparticle lattices
Biomolecule-templated plasmonic,
photonic, electronic, and sensing
devices
Biomolecular vehicles for drug
delivery
