

CALL FOR PAPERS

ICSE 2020
Jun 11-12, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSE 2020 : International Conference on Spatial Econometrics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Spatial Econometrics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spatial econometrics
Spatial discrete choice models
Heteroskedastic spatial models
Static and dynamic spatial panel data models
Computation issues in big spatial datasets
Non stationary spatial models
Resampling issues spatial models
Bayesian spatial econometric models

Spatial limited dependent variable models
Spatial duration models
Spatial models with factor structures
Strong and weak dependence in spatial models
Endogenous spatial weights matrix in spatial models
Spatial models with expectation
Nonlinear spatial models
