

CALL FOR PAPERS

ICFTMP 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFTMP 2020 : International Conference on Forest Tending Methods and Principles is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Tending Methods and Principles. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forest tending methods
Woodland management
Tending operations in silviculture
The role of tending cuts in the formation and maintenance of multifunctional forest
The goals of tending cuts in relation to the forest function
Methods of tending cuts
Suitable method of forest regeneration
Echnical quality of wood
Hygiene of forests
Forest resistance

Sustainable forest management principles
Tending strategy
Local modifications
Productive, ecological and social that forests
Protection of forest environment
Natural and economic goals
Tending treatments
Ecological and silvicultural strategies for sustainable forest
Forest harvesting and regeneration methods
Thinning practice
