

CALL FOR PAPERS

ICCOMCC 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCOMCC 2020 : International Conference on Chemical Oceanography and Marine Carbon Cycle is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Oceanography and Marine Carbon Cycle. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical oceanography
Chemical components
Reaction mechanisms
Geochemical pathways
Solid earth and the atmosphere
Material inputs to and outputs from marine waters
Orthochemical and biological production
Transformation of chemical compounds
Phases within the marine system
Determination of reaction rates and study of equilibria

Constituents of seawater
The salinity of seawater
Conservative elements
Bioactive elements
Adsorbed elements
Ocean circulation
Wind-driven circulation
Thermohaline circulation
Ocean biology
