

CALL FOR PAPERS

ICSGP 2021
Jan 25-26, 2021
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGP 2021 : International Conference on Structural Geology Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Geology Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural geology	Force, traction and stress
Fundamentals of structural geology	Paleostress analysis
Processes in structural geology and tectonics	Stress perturbation
Structural geology and map interpretation	Folds systems
Structural geology and structural analysis	Use and importance
Methods of structural geology	Methods
Field geology	Geometries
Geophysics	Measurement conventions
Data synthesis and analysis	Plane, fabric, fold and deformation conventions
Extensional fractures and shear fractures	Stereographic projections
Joints, stylolithes and stylolitic joints	Rock macro-structures
Faults and tectonic regimes	Rock microstructures
Fault kinematic analysis	Kinematics
