

## **CALL FOR PAPERS**

ICDFDM 2021 Feb 08-09, 2021 Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDFDM 2021: International Conference on Deforestation and Forest Degradation Monitoring is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Deforestation and Forest Degradation Monitoring. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Monitoring forest degradation Monitoring deforestation and forest degradation Assessing forest degradation Monitoring forest degradation in tropical regions Monitoring forest degradation by remote sensing

Land-cover change Sampling statistics Forest carbon pools Sustainable forest management Monitoring forest degradation for carbon accounting
