

# CALL FOR PAPERS

**ICOTMR 2021**  
**Apr 29-30, 2021**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOTMR 2021 : International Conference on Optimization Technologies for Manufacturing and Remanufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Optimization Technologies for Manufacturing and Remanufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Optimizing the design and advanced manufacturing processes for optimizing energy and material's efficiency  
Optimizing process technologies for transforming scrap into reusable raw materials  
Optimizing remanufacturing processes

Optimizing techniques for low fossil-carbon and sustainability applications  
Testing, improving and implementing decision-support systems for advanced manufacturing and remanufacturing  
Manufacturing process optimization for low fossil-carbon and sustainability applications
