

CALL FOR PAPERS

ICWMP 2021
Apr 19-20, 2021
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWMP 2021 : International Conference on Wood Microbiology and Preservation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wood Microbiology and Preservation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|---|
| Wood microbiology | Chemical changes in wood caused by decay fungi |
| Forest mycology and plant pathology | Ultrastructural features of wood decay |
| Structural, chemical and moisture features of wood | Changes in the strength and physical properties of wood caused by decay fungi |
| General features, signs and effects on wood anatomy of wood decay. | Colonization and microbial interactions in wood decay |
| Trends in wood microbiology research | Biodeterioration of stored wood and its control |
| Wood deterioration agents | Wood stains and discolorations |
| The characteristics and classification of fungi and bacteria | Decay problems associated with some major uses of wood products |
| Factors affecting the growth and survival of fungi in wood | The detection of internal decay |
| Fungal metabolism in relation to wood decay | Natural decay resistance |
| Recognition, and anatomical aspects of wood decay | Chemical protection of wood |
