

CALL FOR PAPERS

ICDCC 2021
Aug 12-13, 2021
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCC 2021 : International Conference on Digital Circuits and Coding is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Digital Circuits and Coding. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electric energy processing
Electromagnetic and photonics
Electro-optical phenomena of semiconductors
Power electronics and energy systems
Signal processing
Techniques of laser and applications Of electro-optics
Simulation of propagation
Circuits, devices and systems
Smart grid and circuit
Signal and multimedia processing
Computers, software and applications
Ocean engineering and marine technology
Computers, software and applications

Biomedical electronics and bioinformatics
Communication engineering
Electronics and electrical engineering
Computer science applications
Nano electro mechanical System
Photonics and optoelectronics
Networking, communication and multimedia
Information engineering
Wireless/Mobile communication and computing
Software specification and software assurance
Analysis of power quality and system stability
Assembly and packaging
Analog circuits and digital circuits
