

CALL FOR PAPERS

ICVBSST 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICVBSST 2022 : International Conference on Vehicle-Based Sensing and Sensor Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Vehicle-Based Sensing and Sensor Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Architectures and frameworks for crowdsensing and vehicular-based sensing
Communications and networking for crowdsensing and vehicular-based solutions
Context-aware crowdsensing
Data retrieval and processing in crowdsensing environments
Smartphone-based applications for crowdsensing
Integration of crowdsensing solutions in the Smart City paradigm

Floating content for information sharing in vehicular environments
Vehicles as mobile sensors
Context-aware data sensing and dissemination in vehicular environments
Emerging sensing solutions using autonomous vehicles and unmanned aerial vehicles
Cloud-based solutions for handling crowdsensing and vehicular-based sensing data
