

CALL FOR PAPERS

ICPTSPE 2022
Oct 28-29, 2022
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPTSPE 2022 : International Conference on Power Transmission Systems in Power Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power Transmission Systems in Power Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power engineering	Power system protection
Power systems engineering	Power flows
Power systems	High voltage technology
Basics of electric power	Power electronics
Electric power transmission	Energy storage
Electric power	Electrical devices
Electrical machines	Energy economics
Power generation	Generators, motors and transformers
Power transmission	Electric railway networks
Power transmission systems	Electricity
Power distribution	Energy Systems and Energy Economy
Utilization	Current and voltage
Power electronics	Computers and digital equipment
