

CALL FOR PAPERS

ICSGE 2022
Nov 15-16, 2022
Jeddah, Saudi Arabia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGE 2022 : International Conference on Sedimentology and Geological Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sedimentology and Geological Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Physical sedimentary processes
Biotic sedimentary processes
Chemical sedimentary processes and diagenesis
Geochemical record of sedimentation
Economic sedimentology
Freshwater carbonates
Alluvial, colluvial and lacustrine depositional systems
Aeolian depositional systems
Glacial depositional systems
Volcanic depositional systems
Shallow-marine depositional systems

Deep-marine depositional systems
Carbonate platforms and reefs
Cycles and rhythms in sedimentary record
Sequence stratigraphy: eustatic vs. tectonic control on sedimentation
Environmental sedimentology: challenges of global warming and geohazard prediction
Sedimentary record of climate change
Trace fossils and environmental analysis
Remote sensing, imaging and numerical modelling in sedimentology
Geophysics in sedimentology
Research frontiers in sedimentology
